High Volume Ink Jet (DOD) Drop On Demand

High Speed card personalization throughput running at speeds of 30,000 cards per hour using UV DOD technology, providing exceptional print quality, minimal set-up and changeover time, reliable data integrity, system controller software, flexible card feeder and card transport, magnetic stripe encoding, in line barcode grading, simplex and duplex printing, camera verification, in line label scratch off, and label affixing.

High Volume Ink Jet MEK

Delivers high speed for short and long runs up to 40,000 cards per hour for CR80, quick set up times and fast job changeover, consistent production performance, low card personalization costs, high performance labeling, excellent for telecom Pre-paid scratch cards, magnetic encoded cards, telecom prepaid multi vouchers and lottery gaming cards.

PLC-12500 D Labeler

The PLC-12500 D Card Labeler is designed to affix Card Activation Notice labels to your embossed or non-embossed plastic cards. With a built-in LED counter, accuracy is assured. Automatically stops when a card flow error is encountered. Push button controls allow for easy setup. Card sequence is maintained throughout labeling process.

Spartanics 620 Card Counter

The Spartanics 620 Card Counter is designed to provide an accurate count of plastic cards in or out of trays, sleeves or boxes. It automatically verifies the count of embossed and non-embossed cards. Includes accumulator for totaling multiple counts. RS232 serial port for connecting to PC computer to store audit trail data. Centronix parallel port to interface with a Dot Matrix printer. Covers the most standard card thicknesses: .024" to .032".

Spartanics 640 Card Counter

The Spartanics 640 Card Counter is designed to provide an accurate count of plastic cards in or out of trays, sleeves or boxes. It automatically verifies the count of embossed and non-embossed cards. Accumulator for totaling multiple counts. RS232 serial port for connecting to PC computer to store audit trail data. Centronix parallel port to interface with a Dot Matrix printer. Counts a wide variety of card thicknesses from .010" to .080". This includes the newer "thin" phone cards as well as traditional "credit card" type cards

Diagenics PCC 5350 G Card Counter

The Diagenics PCC 5350 G Card Counter is designed to provide an accurate count of plastic cards in or out of trays, sleeves or boxes. It automatically verifies the count of embossed and non-embossed cards in either CR-80 or CR-50 format. Accumulator for totaling multiple counts. Counts a box of cards at the rate of 500 cards in two seconds. Automatic self-diagnostic test at start-up.
